

Experiment No. 1

Student Name: Soumya Suryawanshi

PRN: 24070521062

Experiment Title: Develop a User Information Form using HTML, CSS and JavaScript to demonstrate user input, DOM manipulation, alert boxes and console methods.

Software / Tools Required

- Visual Studio Code
- Google Chrome
- HTML5
- CSS3
- JavaScript (ES6)

Experiment Program Code

Files Used:

- [index.html](#)

```
<!DOCTYPE html>
<html>

<head>

  <title>JS Practical 1</title>

  <!-- External CSS -->
  <link rel="stylesheet" href="style.css">

</head>

<body>

  <div class="container">

    <h1>User Information Form</h1>

    <label>Enter Name</label>
    <input type="text" id="name" placeholder="Enter your name">

    <label>Enter Age</label>
    <input type="number" id="age" placeholder="Enter your age">

    <label>Select Gender</label>
    <select id="gender">
      <option value="">Select Gender</option>
      <option>Male</option>
      <option>Female</option>
```

```
    <option>Other</option>
</select>

<label>Enter Email</label>
<input type="email" id="email" placeholder="Enter your email">

<label>Enter Mobile Number</label>
<input type="tel" id="mobile" placeholder="Enter mobile number">

<label>Select Course</label>
<select id="course">
    <option value="">Select Course</option>
    <option>B.Tech</option>
    <option>BCA</option>
    <option>B.Sc</option>
    <option>MCA</option>
</select>

<label>Enter City</label>
<input type="text" id="city" placeholder="Enter your city">

<button onclick="showWelcome()">Submit</button>

<hr>

<div id="output">
    <p>Result will be displayed here.</p>
</div>

</div>

<!-- External JavaScript -->

</body>

</html>
```

- [script.js](#)

```
alert("Welcome to SIT Nagpur");
```

```
function showWelcome(){

    let name=document.getElementById("name").value;
    let age=document.getElementById("age").value;
    let gender=document.getElementById("gender").value;
    let email=document.getElementById("email").value;
    let mobile=document.getElementById("mobile").value;
```

```

let course=document.getElementById("course").value;
let city=document.getElementById("city").value;

if(name=="" || age=="" || gender=="" || email=="" || mobile=="" || course=="" || city==""){
    alert("Please fill all the fields.");
    return;
}

document.getElementById("output").innerHTML=
"<h2>Welcome, "+name+"!</h2>"+
"<p><b>Age :</b> "+age+"</p>"+
"<p><b>Gender :</b> "+gender+"</p>"+
"<p><b>Email :</b> "+email+"</p>"+
"<p><b>Mobile :</b> "+mobile+"</p>"+
"<p><b>Course :</b> "+course+"</p>"+
"<p><b>City :</b> "+city+"</p>";

console.log("Name : "+name);
console.log("Age : "+age);
console.log("Gender : "+gender);
console.log("Email : "+email);
console.log("Mobile : "+mobile);
console.log("Course : "+course);
console.log("City : "+city);

console.warn("This is a warning message.");
console.error("This is an error message (Demo Purpose).");

alert("Thank you for submitting!");
}

```

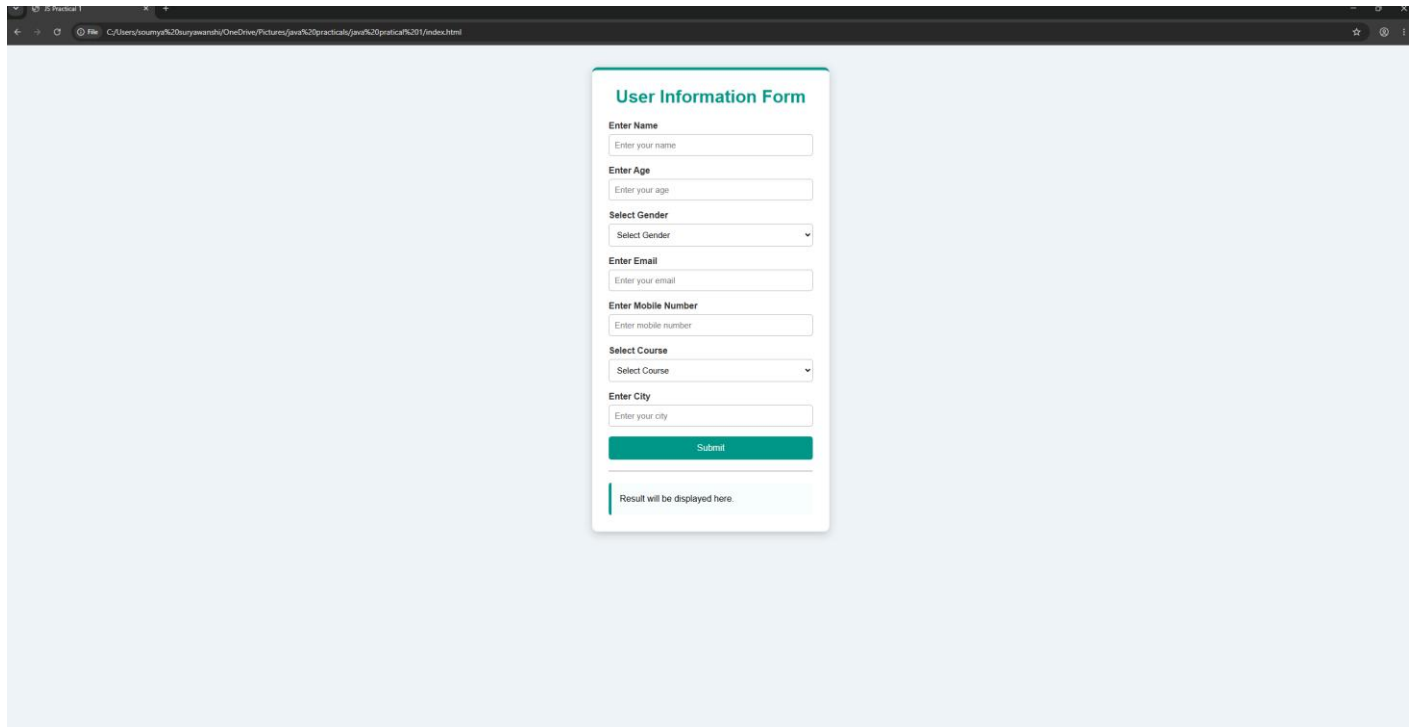

Application Description

The application collects user information including Name, Age, Gender, Email, Mobile Number, Course, and City. It validates all fields, displays the submitted details dynamically on the webpage, and demonstrates alert boxes, console methods, and DOM manipulation using JavaScript.

Features Implemented

Feature	Description
HTML Form	Collects user information
Input Validation	Checks that all fields are filled
DOM Manipulation	Displays entered details dynamically
Alert Boxes	Welcome and submission messages
Console Methods	Uses console.log(), console.warn(), console.error()
JavaScript Function	showWelcome()
Event Handling	Submit button executes JavaScript

Output

The screenshot shows a web browser window with a file path in the address bar: `C:\Users\sonmya%20suryawanshi\OneDrive\Pictures\java%20practicals\java%20practical%201\index.html`. The browser displays a 'User Information Form' centered on a light blue background. The form is a white box with a teal header and a teal 'Submit' button. It contains the following fields: 'Enter Name' (text input), 'Enter Age' (text input), 'Select Gender' (dropdown menu), 'Enter Email' (text input), 'Enter Mobile Number' (text input), 'Select Course' (dropdown menu), and 'Enter City' (text input). Below the form is a teal box with the text 'Result will be displayed here.'

Output Summary

- Displays a welcome alert on page load.
- Accepts user information.
- Validates all fields.
- Displays entered details below the form.
- Shows a success alert after submission.
- Prints user details in the browser console.

Result / Conclusion

The User Information Form was implemented successfully using HTML, CSS, and JavaScript. The experiment demonstrated form handling, input validation, DOM manipulation, alert boxes, console methods, and JavaScript functions to collect and display user information dynamically.
